LETTER NO.

TO : TSG/ESD

ATTN: [redacted] 25X1

[redacted] 25X1

Attached are 2 copies of [redacted] 25X1 suggested instruments for HPSC maintenance.

Once again, none of the instruments will have to be purchased by you for the installation of the HPSC in [redacted] 25X1 Item 2 is to be made by [redacted] 25X1 shop prior to installation. Drawings of eye-piece assembly are due next week from [redacted] 25X1

Item 1 will be handy for ESD to check servos during maintenance of this instrument and others in the building.

Item 4 [redacted] 25X1 includes tool chest or cart on wheels and metric tools.

SIGNATURE

REPLY DATE

They are going to include in the Diagnostic Routine a table lookup to check various pots etc. to compile phase shift but Item 1 would be useful in analyzing the specific maintenance problem.

The question [redacted] had on standardizing metric sizes. 25X1 ISO, the equivalent of our Am. Standards, is setting up standards for metric wrenches and this is what Terry mentioned on 20 Aug 1970.
